PROFESSIONAL EXPERIENCE

Systems & Technology Consultant Volunteer 2026 - Present
Project Vietnam Foundation *Santa Ana, CA*

- Resolved urgent & critical email issues where messages bounced or were silently routed to spam.
- Implemented DKIM & DMARC to strengthen domain trust and improve email reliability.

Frontend Engineer Dec 2024 - Aug 2025
terraine.ai *San Jose, CA (Remote)*

- Built frontend for AI-augmented chip design platform (**React 18**, **TypeScript**, **WebSockets**).
- Implemented **OAuth**, session management, and **responsive** workflows supporting chat and document preview using **Radix UI** & **Tailwind**
- Created prompting standards, **PRDs**, and API specs to improve code quality and frontend ↔ backend hand-offs during rapid **AI-assisted development.**

Full Stack Software Engineer May 2022 - May 2024
We Sparkle Co. *Minneapolis, MN (Remote)*

- Resolved critical signup flow failures affecting live webinar and sales outreach events by consolidating free, paid, and promo paths into a shared pipeline across **Auth0**, **Cosmos DB**, and **Zoho CRM**, eliminating edge cases that required manual intervention.
- Integrated third-party services for payments, scheduling, CRM, analytics, and identity management, including **Coinbase**, **Zoho**, **Nylas**, **GA4**, and **Auth0**
- Prototyped a RAG-based knowledge system, querying 400+ pages of government documentation and existing department web content.
- Standardized local development with **Docker** and seeded databases, resolving cross-platform Azure connectivity issues and preventing runaway API calls.
- Worked with product, engineering, and business stakeholders to define requirements, test releases, and improve system reliability and accessibility.

Instructor, Data Analytics Mar 2024 - Aug 2024
Co-Instructor, Backend Development May 2023
Hack The Gap *St Paul, MN (Remote)*

- Designed and taught backend development and data analytics curriculum covering **Node.js, Express, APIs**, **SQL**, **spreadsheets**, **Tableau**, **ETL/ELT**, **data cleaning**, **analysis**, and **visualization**.
- Developed instructional materials, demos, exercises, and procedures for learners with varied technical experience, collaborated with program staff to improve course delivery and outcomes.

Independent Software Consultant Sept 2021 - May 2022
Self-Employed *Remote*

- **Identified business needs**, **evaluated existing processes**, and **defined functional and technical requirements for web and mobile systems**.
- Designed, developed, tested, and deployed web and mobile features integrated with cloud infrastructure, databases, APIs, authentication services and third-party platforms.

Cybersecurity Intern Jun 2021 - Aug 2021

CodeDay Labs · AMSYS Innovative Solutions *(Remote)*

- Deployed an **authorized internal phishing-awareness exercise** and analyzed campaign participation data to support security education.
- Built and deployed containerized **Linux** security tools and applications on **AWS EC2** and **DigitalOcean**.

Library Techlab Manager Sept 2015 - Aug 2019

California Institute of Technology (Caltech) · *Pasadena, CA*

- Scaled **makerspace** from pilot program to permanent library service — onboarding 600+ users, producing 425+ monthly prototypes, managing a team of 7-10 staff and volunteers.
- Consulted with researchers & students to **i**dentify project requirements, evaluate technical feasibility and suggest improvements.
- Created **documentation, troubleshooting resources** and regularly conducted user training.
- Configured, debugged and maintained 3D printer equipment, CAD software environments, 3D Slicer profiles, and 3DPrinterOS print-queue servers.
- Reduced material costs and waste through process analysis, testing and vendor outreach.

Library IT Associate June 2014 - Aug 2019

California Institute of Technology (Caltech) *Pasadena, CA*

- Installed, configured, maintained and updated **Windows** & **macOS systems**, **printers**, AV systems, workstations, mobile devices and peripherals and campus' digital signage system.
- Supported identity and access workflows integrated with campus' **Active Directory**.
- Documented hardware, software, network, account, printing, and application issues in **Jira**.

EDUCATION

CompTIA A+ Core 1 & 2 - Information Technology Support In Progress

Calbright College *Online, CA*

Google Data Analytics Professional Certificate [ID: 2I54HMPFFY0S] Sept 2024

Coursera *Online, CA*

BS in Applied Computer Science, Aug 2021

Concentrations in Backend Web & Frontend Web

Dominican University of California *San Rafael, CA*

Team Lead, Industry Partner Collaboration Project · Oct 2020 - Jan 2021

- Led a five-student team in analyzing a manual library workflow and turning it into product requirements and a semi-automated solution.
- Built a **data pipeline** and **web interface** to parse, clean, and save records to Google Sheets, reducing manual processing by approximately 75%.
- Facilitated **sprint planning**, **retrospectives**, and **stakeholder demos**.
